PROFESSIONAL SUMMARY

MS CS student (NC State, May 2026) with production React and TypeScript experience across multiple deployed products. At Isomer AI, shipped 10+ frontend and backend features in a TypeScript/React/Node.js stack across 7 production deployments -- building real-time event UIs with Pusher, document workflows, and role-based access flows with a strong focus on clean, polished interfaces. Built AlgoPulse (React + streaming UI, 2,000 async AI req/sec) and Sanjeevani (React, Top 1% of 1,100+ teams, shortlisted for UI and product innovation). Equally comfortable owning the full stack: Node.js/Express APIs, PostgreSQL, Redis, Docker, and cloud infra on AWS and GCP.

CORE COMPETENCIES

React (v16+) & TypeScript

JavaScript (ES6+)

Full-Stack Product Engineering

Real-Time UIs (Pusher / WebSockets)

Node.js / Express APIs

PostgreSQL & Redis

UI/UX Design Sensibility

AI-Native Development

AWS & Cloud Infrastructure

EXPERIENCE

Isomer AI May 2025 - Present
Product Engineer Intern - Remote

- Shipped **10+ production features** in a **TypeScript/React/Node.js/PostgreSQL** stack across 7 deployments -- building real-time event UIs (Pusher), document processing workflows, RBAC flows, and multi-model AI integrations end-to-end with a strong emphasis on clean, polished interfaces
- Converted business requirements into responsive, performant React UIs; collaborated directly with product and backend in a cross-functional startup environment -- **394 commits** to production
- Integrated Auth0, Redis, Docker, Sentry, and S3 across the full stack; participated in code review and maintained consistently high UI quality across releases

NC State University Apr 2025 - Present
Graduate Research Assistant

- Built a **React + JBrowse 2** genomic data platform on Google Cloud Run serving 100+ researchers across 500GB of datasets; designed intuitive data visualization interfaces for complex genomic workflows

Mphasis (HP Company) Jun 2024 - Aug 2024
Software Developer Intern

- Built 5+ AI-driven automation workflows in Python; automated deployments on AWS & GCP with Grafana monitoring dashboards; improved health claim accuracy by 25%

Capgemini Jun 2023 - Aug 2023
AI/ML Intern

- Built Kafka streaming + Spark batch pipelines for real-time support ticket analysis; reduced latency by 20%

PROJECTS

AlgoPulse - Full-Stack AI Platform Independent · 2025

Built a **React + Node.js** full-stack AI platform with real-time streaming UI via Supabase Edge Functions. Designed a responsive, low-latency interface for live AI inference results. Scaled backend to **2,000 async AI inference req/sec** with Temporal.io workflow orchestration and Kafka state sync -- zero state loss under load.

TypeScript · React · Node.js · Temporal.io · Kafka · Supabase Edge Functions · PostgreSQL

Sanjeevani - Health App Top 1% of 1,100+ teams

Full-stack **React** health application with ML-powered predictive insights achieving 87% accuracy on real-time sensor data. Shortlisted **top 12 of 1,100+ teams specifically for UI quality and product innovation** -- judges cited the interface design as a standout.

React · Node.js · Python · ML classification models

CryptoKnight - Trustless AI Trading Agent HackNC State · 2025

Autonomous Polymarket trading agent with a **Next.js 16 + viem + wagmi** frontend and Python agent backend. Built complete UI for managing Session Key policies (trade limits, allowances, expiration) using ERC-4337 Account Abstraction -- 100% autonomous, 0 private keys shared.

Next.js 16 · viem · wagmi · Python · ERC-4337 · Alchemy Account Kit

PerCent - GenAI Finance App HackNC24 Top 10 of 100+ teams

Full-stack fintech app with goal tracking, expense logging, and a RAG-powered AI chatbot (Qwen-14B-Chat). Built complete React + backend MVP in 48 hours -- ranked top 10 at HackNC24.

React · Node.js · Python · Hugging Face · Qwen-14B-Chat · RAG

EDUCATION

North Carolina State University - MS Computer Science Aug 2024 - May 2026

Courses: Artificial Intelligence, Operating Systems, Data Science, Software Engineering, Algorithms

Mumbai University - BTech Computer Science Aug 2020 - May 2024

CGPA: 9.32/10 · Courses: DS & Algorithms, Machine Learning, Software Engineering, Big Data Infrastructure

SKILLS

Frontend: React (v16+), TypeScript, JavaScript (ES6+), Next.js, Tailwind CSS, Vite, HTML/CSS

Backend: Node.js, Express, Python, PostgreSQL, Redis, Prisma, REST APIs

Infrastructure: AWS, GCP, Docker, CI/CD, Kafka, Temporal.io, Git

AI/ML: OpenAI API, Anthropic Claude, LangChain, MCP, RAG, PyTorch, TensorFlow, Hugging Face

Other: Java, C, SQL, Grafana, Sentry, Auth0, S3, Pusher, viem, wagmi
