

Employment

Product Engineer Intern	Isomer AI	May 2025 – May 2026
- Deployed 10+ production AI features into enterprise workflows using Python and TypeScript, including multi-model LLM pipelines (Claude, GPT-4o, Gemini), Temporal.io agentic workflows with MCP tooling, and Auth0 RBAC; delivered across 923 commits and 7 production deployments. - Owned the full backend stack – PostgreSQL, Redis, Docker, Terraform, Sentry APM – managing CI/CD pipelines, resolving production incidents, and maintaining SLA across enterprise client environments.		
Graduate Research Assistant	NC State University	April 2025 – Present
- Designed and deployed a cloud-based genomic data platform on GCP (Cloud Run) with JBrowse 2, enabling interactive exploration of 500GB+ strawberry and grape datasets for over 100 researchers worldwide. - Collaborated on ML architecture design, applying hyperparameter tuning and time-series feature analysis to improve model accuracy by 12% on biological sensor data.		
Software Developer Intern	Mphasis (HP Company)	Jun 2024 – Aug 2024
- Built 5+ AI-driven workflows including a health claim automation tool using OCR, NLP, and ML models, improving document processing accuracy by 25% across high-volume enterprise insurance pipelines. - Automated deployments on AWS and GCP via CI/CD pipelines, integrated Grafana monitoring dashboards, and led model red-teaming efforts to enhance production reliability.		
AI/ML Intern	Capgemini	Jun 2023 – Aug 2023
- Led end-to-end SDLC for a data-driven support ticket analysis system using NLP classification, reducing average resolution time by 15% across enterprise clients. - Implemented distributed data pipelines using Hadoop and Spark for batch processing, and integrated Kafka streaming for real-time data ingestion, cutting ticket-processing latency by 20%.		

Education

Raleigh, NC	North Carolina State University	Aug 2024 – May 2026
Master of Science in Computer Science. Courses: Artificial Intelligence, Operating Systems, Algorithms, Data Science, Object Oriented Development, Software Engineering.		
Mumbai, India	Mumbai University	August 2020 – May 2024
Bachelor of Technology in Computer Science; CGPA: 9.32/10. Courses: Data Warehousing, Big Data Infra, DS & Algorithms, Machine Learning, Software Engineering, Blockchain.		

Projects

LLM Eval Harness	AI Model Validation Platform	2025
- Built a vendor-neutral evaluation harness comparing Claude, GPT-4o, and Gemini across 2,000 frozen examples, tracking ExactMatch, TokenF1, hallucination rate, abstention accuracy, p50/p95 latency, and cost-per-call. - Applied Bootstrap confidence intervals and McNemar tests with Holm-Bonferroni correction across 3 repeated runs per model to surface statistically significant regressions; exported metrics to a DuckDB + Parquet + Streamlit dashboard.		
AlgoPulse	Full-Stack Agentic AI Platform	2025
- Orchestrated multi-step agentic AI reasoning pipelines on Temporal.io and Kafka, sustaining 2,000 async inference requests per second under sustained production load with zero message loss or state corruption. - Replaced API polling with event-driven Supabase Edge Functions, delivering real-time AI streaming to React Native clients with sub-200ms SSE latency and eliminating state loss under 2,000 req/sec sustained load.		
CortexQ	Kubernetes LLM Inference Platform	2026
- Built a Kubernetes-native LLM inference platform on GCP with a FastAPI router, KEDA autoscaler (scale-to-zero to N replicas), Kopf CRD operator for multi-provider LLM serving, and circuit breaker + EWMA load balancing. - Instrumented OpenTelemetry traces, Prometheus metrics, and Grafana dashboards across all service boundaries; automated Helm and ArgoCD GitOps deployments; load tested to 500 VUs with k6; validated with 88 pytest tests.		

Languages and Technologies

- Languages:** Python, TypeScript, JavaScript, Java, Scala, SQL, Bash
- AI/ML:** Claude/GPT-4o/Gemini APIs, LangChain, RAG, LLM evaluation, scikit-learn, PyTorch, TensorFlow, Pandas, DuckDB, Spark
- Cloud & DevOps:** AWS, GCP, Azure, Docker, Kubernetes, CI/CD, Terraform, Helm, ArgoCD, OpenTelemetry, Prometheus, Grafana
- Frameworks/Tools:** FastAPI, Node.js, NestJS, React, Temporal.io, Kafka, PostgreSQL, Redis, REST APIs, Streamlit, Git

Additional Experience and Awards

- Lead at Google Developers Student Club:** Led 4+ tech events (hackathons, conferences) reaching 500+ students.
- National Hackathon Winner & IEEE Published:** Ranked Top 10 in 6+ national hackathons, built 3 MVPs in 48-hour sprints; co-authored Cybersecurity Threat Detection paper (Springer icSoftComp 2023), presented to 500+ attendees.
