

Employment

Product Engineer Intern	Isomer AI	May 2025 – May 2026
- Ship 10+ production AI features end-to-end: multi-model LLM pipelines (Claude, GPT-4o, Gemini), Temporal.io agentic workflows, and REST API integrations; 923 commits across 7 production deployments. - Engineered agentic AI workflows (Claude, GPT-4o, Gemini) via MCP with provider-agnostic interfaces; built document processing (PDF gen, email parsing, S3) and full Playwright end-to-end test coverage.		
Graduate Research Assistant	NC State University	April 2025 – Present
- Deployed cloud-native genomic data platform on GCP (Cloud Run) with JBrowse 2 genome browser, enabling interactive visualization of 500GB+ strawberry and grape genome datasets for 100+ researchers. - Improved ML model accuracy by 12% by applying hyperparameter tuning and time-series feature engineering on biological sensor data collected from strawberry and grape genomic field experiments.		
Software Developer Intern	Mphasis (HP Company)	Jun 2024 – Aug 2024
- Built 5+ AI workflows including health claim automation using OCR, NLP, and ML classification pipelines on medical records; improved end-to-end document processing accuracy by 25% across 10K+ daily claims. - Automated cloud deployments across AWS and GCP via CI/CD; integrated Grafana observability dashboards and led model validation and red-teaming sessions to improve reliability across production services.		
AI/ML Intern	Capgemini	Jun 2023 – Aug 2023
- Led end-to-end SDLC for a data-driven enterprise ticket analysis system using NLP classification models; reduced average resolution time by 15% and eliminated manual triage for 2,000+ monthly tickets. - Implemented distributed data pipelines using Kafka streaming and Spark + Hadoop batch processing for large-scale ticket ingestion; reduced end-to-end ticket-processing latency by 20% at peak load.		

Education

Raleigh, NC	North Carolina State University	Aug 2024 – May 2026
- Master of Science in Computer Science - Courses: Artificial Intelligence, Operating Systems, Algorithms, Data Science, Object Oriented Development, Software Engineering, Programming Languages, Computer Networks, Distributed Systems.		
Mumbai, India	Mumbai University	Aug 2020 – May 2024
Bachelor of Technology in Computer Science; CGPA: 9.32/10. Courses: Data Warehousing, Big Data Infrastructure, DS & Algorithms, Machine Learning, Blockchain, Computer Networks, Database Systems.		

Projects

LLM Eval Harness	Independent Project	2025
- Built vendor-neutral LLM evaluation harness in Python comparing Claude, GPT-4o, and Gemini across 2,000 frozen labeled examples spanning factual recall, reasoning, and code generation tasks. - Tracked hallucination rate, p50/p95 latency, and cost-per-call across 6 metrics; applied bootstrap confidence intervals and McNemar significance tests to compare model performance across providers.		
Glance AI	Privacy-First Healthcare RAG	2025
- Designed per-tenant RAG pipeline for healthcare compliance with strict vector isolation and PostgreSQL namespace partitioning, preventing cross-tenant data leakage and LLM hallucinations at scale. - Implemented deterministic retrieval using Hugging Face embeddings and HNSW vector indexing; eliminated context bleed between tenants in regulated environments for factual, auditable LLM outputs.		

Languages and Technologies

- Languages:** Python, TypeScript, JavaScript, Java, SQL, Bash
- AI/ML & Evals:** Claude/GPT-4o/Gemini APIs, MCP, LangChain, RAG, LLM evaluation, Hugging Face, Temporal.io, prompt engineering
- Frontend & Backend:** React, Node.js, Express, FastAPI, PostgreSQL, Redis, REST APIs, Vercel
- Cloud & DevOps:** AWS, GCP, Docker, Kubernetes, GitHub Actions, Grafana, Prometheus, Playwright

Additional Experience and Awards

- IEEE Published:** Co-authored and presented research on Computer Vision-Based Cybersecurity Threat Detection at the Springer icSoftComp 2023 international conference, reaching an audience of 500+ global attendees.
- National Hackathon Winner:** Won or ranked Top 10 in 6+ national hackathons spanning ML, systems, and developer tools; built 3 complete full-stack MVPs end-to-end in 48-hour competitive sprints, each delivering a working live demo.
